

# UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

## TRANSPORTATION SECURITY ADMINISTRATION (TSA) QUESTIONNAIRE

Please answer the following questions, providing additional information as requested.  
(Responses should be returned within 60 days of receipt.)

### A. SITE LOCATION INFORMATION:

**AIRPORT SITE NAME:** TSA at Luis Munoz Marin International Airport

**Site Location:** Terminal D, TSA Operations Office, Suite 4010  
(Airport Street Address)

Terminal D, TSA Operations Office, Suite 4010  
(Hazardous Waste Storage Area Address)

Carolina PR 00979  
(City) (ST) (Zip)

Latitude: N18° 26' 19.28" Longitude: W66° 0' 24.22"

### QUESTIONNAIRE PREPARER:

**Name & Title:** Michael A. Brown, Environmental Planner **Date:** 7/18/11

**Address:** SAIC, 8301 Greensboro Drive  
(Street Address)

McLean VA 22102  
(City) (ST) (Zip)

**E-Mail Address:** brownmic@saic.com **Phone:** 706.993.8132

### CONTACT PERSON:

**Name & Title:** Alexis Ortiz, Environmental Management Coordinator (EMC)

**E-Mail Address:** alexis.ortiz@dhs.gov **Phone:** 787.253.4591

**DATE OF NOTIFICATION UNDER RCRA:** 08 January 2007 (SQG  
Notification) 19 August 2008 (subsequent LQG notification)

**PERIOD COVERED BY ABOVE NOTIFICATION:** 19 August 2008 through present.

372845

**B. HAZARDOUS WASTE/HAZARDOUS SUBSTANCE INFORMATION:**

**For Period from: 8/19/2008 to 4/12/2011**

1. Does your TSA site segregate its hazardous waste? ☒ Yes ☐ No

(See <http://www.epa.gov/oem/content/hazsubs/cersubs.htm> for a definition of hazardous waste.)

2. If the site's hazardous waste is segregated, what quantity of hazardous waste is generated on a monthly basis?

The gross (including containers and packing materials) generated monthly reached a high of approximately 3,200 pounds, and currently varies from approximately 1,700 to 2,400 pounds per month. The hazardous waste generated is predominately consumer products abandoned by passengers such as hair spray, deodorant, shaving cream, lighters, and drinking alcohol, which are classified with a D001 (ignitable) waste code. One year of manifests are provided on the accompanying CD for reference.

3. Where is the hazardous waste stored (e.g., outside storage pad, inside enclosed building, warehouse, etc.)?

The hazardous waste accumulation area is located in a key-controlled storage room utilized by TSA within the main terminal building on the top level of the airport. The entrance to the area is through a door facing onto a paved public sidewalk in front of the terminal building.

4. How is the hazardous waste stored (e.g., drums, other containers, etc.)?

The hazardous waste is stored in its original consumer container (typically less than one quart in volume) which is then placed inside a second container (typically a 30 to 55-gallon steel or HDPE drum with a locking lid).

5. Is the hazardous waste stored in drums with secondary containment? ☒ Yes ☐ No

If so, what type? The accumulation area has a flat concrete floor and is directly inside the exterior door of the building. The area around the exterior door is a concrete sidewalk which leads to the publicly accessible curbside loading and unloading area. The accumulation area is equipped with fire extinguishers, a fire suppression system, and spill kits.

6. How long is the hazardous waste stored? (before it is transported for disposal)

Hazardous waste is removed from the facility, on average, once every two weeks.

7. Describe the site's hazardous waste disposal process:

Hazardous waste is packaged, labeled, and marked by trained personnel and managed while onsite by a RCRA hazardous waste contingency plan. Hazardous waste drums moved to the paved area immediately outside of accumulation area door, where they are emptied of their contents by hand into DOT-approved shipping containers (fiber or metal drums), adjacent to and/or inside the waste hauler's truck. The shipping containers are labeled with DOT shipping labels and manifested to an approved TSDF, primarily for incineration.

8. Have there been any releases of hazardous waste at the site (For example, a spill or a leaking drum)? ☐ Yes ☒ No

a. If so, what type of release(s) occurred?

b. When did the release(s) occur?

c. What was the estimated quantity of the hazardous waste released?

d. Was the release reported to a Federal/State Agency? If so, specify to which Agency.

9. What happened to the released hazardous waste? Was it contained? If not, was any media impacted (e.g., air, soil, surface water, groundwater)?

N/A

10. Following the release, what remediation/clean up efforts were undertaken?

N/A

11. Is there documentation of the remediation/clean up efforts? ☐ Yes ☐ No

N/A

(\*Please include copies of all documentation with this completed questionnaire.)
